

Interlok Clip System

Among the most rigid in the industry. Metalware System shelving is produced in heavy gauge cold-rolled steel. Shelves are made of double-bends on all four sides, complete with closed corners.

Typical view of wedge combination fit. Double lap corner and shelf bracket.

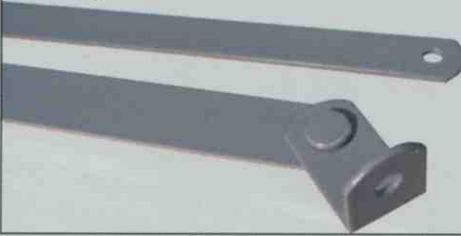

Uprights made of 16 ga. hot rolled steel and are pre-punched, roll formed, welded and cut in one continuous operation.

Choose from open or closed type shelving

Open Type Shelving

Open type shelving requires Heavy Duty 12 ga. bracing.

Closed Type shelving

Requires our unique one piece side panel assembly and back panel for maximum rigidity.

Side panel dimensions:

12, 15, 18, 24, 30" deep
 X 3'4", 6'4", 7'4", 8'4", 9'4" and 10'4" high

Back panel dimensions:

36, 42 or 48" wide
 X 3'4", 6'4", 7'4", 8'4", 9'4" and 10'4" high

Gussets System

Use for flow thru storage.

Box Bin

With dividers and built-in label holder.

Dividers and bins available in many sizes.

Mezzanine Components

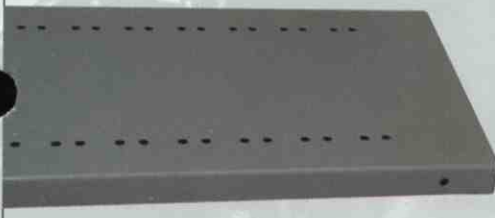

Floor channel made of 14ga. steel. Box type construction c/w 1/4" locking pin.
